

38.5°C

WARMING BLANKET FOR VET1/VET1.5

Warming blanket for layering with variable head/neck cut-out, particularly suitable for dental procedures
Size (L×W) 150×95cm *Item no. 2VT010*

CONNECTING HOSE

Connects the warming blanket, art. no. 2VT010, with the warming mat | Size (L×W) 80×8cm
Item no. 2VT011

HEAT HOSE

For use in the postoperative period
Size (L×W) 150×20cm
Item no. 2VT006

PROTECTIVE COVER FOR WARMING MATS

protects your VET1 warming mat from dirt
Size (L×W) 150×95cm
Item no. 2VT008
Size (L×W) 75×95cm
Item no. 2VT009

CABLE TIE

Holds the hose of your warming air device firmly in the hose connector of your warming mat
Size (L×W) 26/35×2,5cm
Item no. 4KV0004 – green
Item no. 4KV0005 – white

ANIMALS HUMANLY WARM SUPPLIED

MOECK VETERINARY

PRODUCT CHARACTERISTICS

- + *Efficient temperature management system*
- + *Active temperature control*
- + *Convective heating from below*
- + *Heat on all contact surfaces*
- + *Fluid transportation to the inside of the mat*
- + *Free surgical field*
- + *Washable and reusable*
- + *Permeable to X-rays*
- + *High tensile strength*
- + *Pressure relief*
- + *Intraoperative drying*
- + *Compatible with almost all warm air devices*

MOECK VETERINARY

A COMPREHENSIVE AND MODERN TEMPERATURE MANAGEMENT SYSTEM

The MOECK WARMING SYSTEM® provides you with an effective, sustainable and flexible tool for optimal temperature control of small and medium-sized animals. It was developed with the aim to support day-to-day work in medical facilities with an emphasis on quality-based patient care in the best possible way.

THE CONCEPT

Based on the use of convective air transfer, the MOECK WARMING SYSTEM® consists of an air warming device and various types of reusable textile warming mats. The temperature-controlled air, generated by the air warming device, is directed to the inside of the textile products via one to two flexible hoses. Due to the carefully selected materials of the textile products, the supplied air is evenly distributed over a large area under the patient, so that the patient is effectively tempered according to the desired setting on the warm air device.

THE MOECK WARMING SYSTEM® IN DETAIL

The textile products of the MOECK WARMING SYSTEM® are made up of up to three carefully chosen technical fabrics. Each of them has a specific function that, when combined, form a perfectly matched system. The green side, which faces the patient, is made of a finely porous filament fabric (about 35 µm pore size), which provides an even large-area air distribution due to the structure of its surface. The material composition of the filament fabric enables good moisture transport properties and a quick drying time. As a result, the skin's surface remains relatively dry and cooling by so-called „evaporation chills“ is generally reduced. Built-in carbon fibres also counteract static charge.

The white material is equipped with a coating that serves as a barrier to air and liquid. As a result, the air supply is directed to where it is needed - namely to the patient. Liquid ingress is also inhibited on the side facing away from the patient.

A 3D textile structure is additionally fitted in all the MOECK WARMING SYSTEM® mats. Due to its elastic character, it fits the body's contour perfectly, making temperature control possible in any position and without interruption at the contact points. All of the textile materials used are high-strength, durable, X-ray transparent, and latex-free. Our textile products are also compatible with other medical forced-air warming devices. Further information is available upon request.

VET1 – MEDIUM SIZED ANIMALS

Suitable for animals such as large dogs, pigs, sheep, etc.
Size (L×W) 115×65cm | Weight approx. 1.200g
Item no. 2VT001

VET1.5 – SMALL AND MEDIUM SIZED ANIMALS

Suitable for cats and dogs, etc.
Size (L×W) 100×55cm | Weight approx. 830g
Item no. 2VT015

VET2 – SMALL ANIMALS

Suitable for animals such as rabbits, cats, small dogs, rodents, etc.
Size (L×W) 55×65cm | Weight approx. 450g
Item no. 2VT002

IOB – WARM AIR UNIT

Temperature setting between room air, 32°C, 38°C und 43°C
Two selectable fan speed steps
Size (L×W×H) 22×22×28cm
Weight approx. 5,4kg
Item no. 12IB01DE

TWINWARM BB – AIR WARMING DEVICE WITH TWO HOSE CONNECTIONS

Temperature setting accurate to the degree between 28°C and 43°C | Individual five-stage airflow output
Size (L×W×H) 46×46×37cm
Weight approx. 12,6kg
Item no. 12BB01(DE)

TWINWARM®BB
